MAKING A KITE

Scheda per l'insegnante: predisporre il materiale necessario per realizzare l'aquilone e leggere lentamente le istruzioni ai bambini.

You will need (one for each pupil):

- *an A4 sheet of coloured printing paper;*
- *a barbecue stick;*
- *a coloured plastic shopping bag;*
- *a piece of cardboard to roll the string;*
- *scissors.*

And (to be shared among the pupils):

- *masking tape;*
- *a hole punch.*

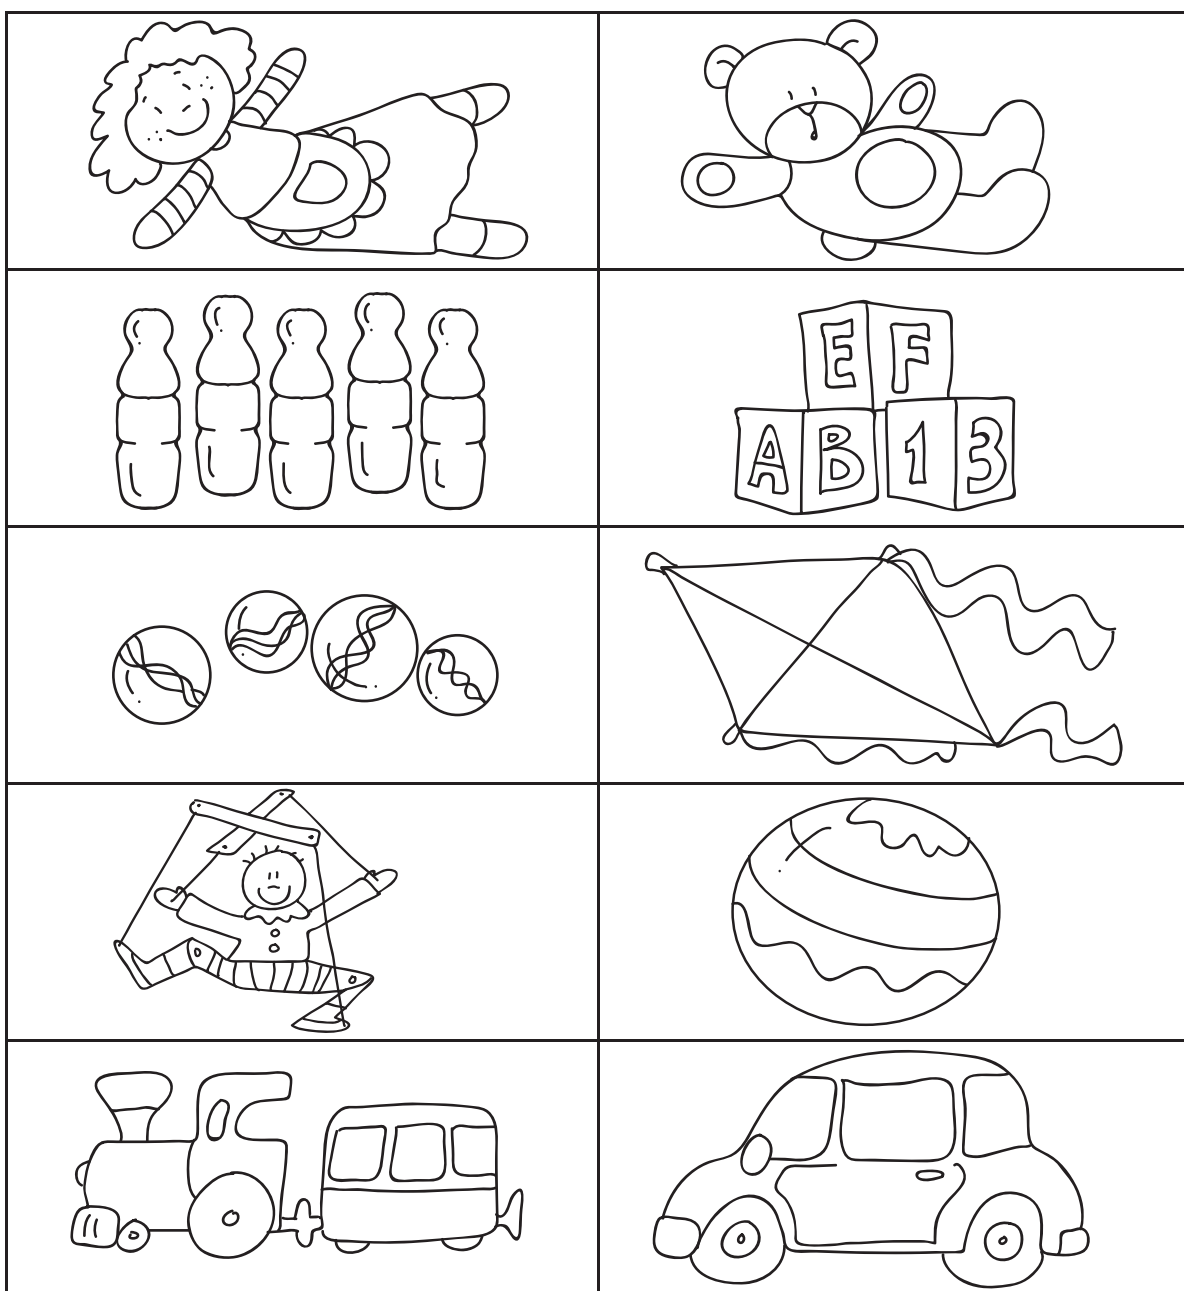

PROCEDURE

- *Fold the paper in half (at the shortest side).*
- *Rotate 90° and fold the paper diagonally.*
- *Flip over and tape the spine [la piega].*
- *Tape the stick perpendicular to the spine.*
- *Cut out the tail from the plastic bag; it should be 2-3 cm wide and as long as you can make it (a longer tail will help the kite balance on windy days). Tape the tail to the bottom of the kite.*
- *Flip the kite over and fold the spine back and forth.*
- *Punch a hole in the spine opposite the stick.*
- *Tie the string to the hole and fly the kite!*
